WELCOME TO STENCIL®

FOR PEOPLE WHO WON'T
COMPROMISE ON QUALITY

With a range of classic, smart and elegant mens and ladies' wear, Stencil® creates clothes suitable for every season. For the past 20 years, Stencil® has developed new materials and styles exclusively for the Australian market, and remains dedicated to creating high-quality garments for Australian corporate, promotional, uniform and sportswear customers.

What sets Stencil® apart from their competitors is a focus on the development of innovative new fabrics. Stencil® fiercely controls the quality of their products by controlling every step of the manufacturing process - from textile research and manufacturing through to design and production of the finished garments.

Jutech™ The Green Industry Solution®

TURNING THE GREEN IDEAL INTO REALITY

As we learn more about climate change and the threat of global warming, it becomes clear that we need solutions in every field of industry. Adhering to the idea of sustainable development, we started research into possible applications of various natural plant fibres during 2002. As a result, the Jutech™ Natural Jute Fibre technology was developed in 2005, and a complete industrial chain based on Jutech™ was established – a total-system green environment solution. Jute (also known as hessian or burlap) was once mainly used as a packaging and agricultural material, with its applications limited to sacking, jute bags, jute rope and similar. The Jutech™ yarn refinement processing and blending technology is an original, innovative technology with completely independent intellectual property with revolutionary new applications for jute – including textiles, homewares and automobile interiors.

A new addition to the Australian market, Jutech™ is unlike any existing material. Because it's made from jute, Jutech™ is the responsible, low-emission choice for companies who care about the environment. A variety of finished materials using Jutech™ are available, including a 100g non-woven fabric suitable for homewares and bags. Since jute greatly reduces the amount of CO₂ emissions produced during growth and harvest stages compared to linen and cotton, and because Jutech™ creates a green link for industry's production chain, we have the opportunity to improve lives – for farmers and rural workers in developing countries, and for everyone in the world.

New to the corporate market, well suited to a great many applications and with vastly reduced CO₂ output compared to other materials, Jutech™ is a fantastic alternative for those who care about the environment.

STENCIL® INDENT ORDERING

Indent is a term used for Custom Factory Orders, developed and manufactured to your company's requirements in our overseas facilities.

Because your order is being custom-made, indent ordering gives you access to decoration features and techniques that aren't available with the usual stock items. We can even create custom fabrics, special colours and garment designs on request – you're limited by your imagination, not our catalogue.

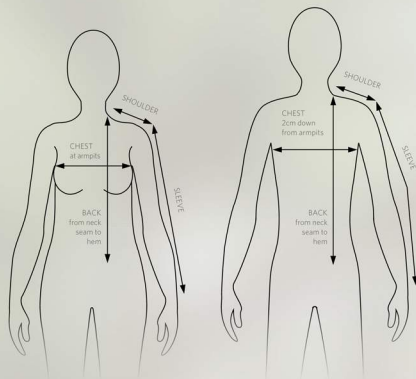

If you need a logo or other detail on your new garments, Stencil can help with that as well. We provide printing, embroidery and sublimation services undertaken by the original supplier during manufacture – giving you more

options for placement, size and colour than with pre-assembled clothing.

With a near-limitless combination of fabric, design and decoration options, indent is ideal for companies who are willing to plan ahead to get the right result. Speak to one of our sales representatives to learn how indent ordering can fulfil your company's specific needs.

The minimum order quantity for indent orders varies from product to product, but can be as low as 400 units of the same colour (e.g. 400 men's, 400 women's, or 200 men's + 200 women's) from any one range in this catalogue.

The lead time for an indent order can be as little as four weeks by air freight, or approximately 10 weeks by sea.

MEASURING TIPS FOR STENCIL® GARMENTS

CHEST

Measure your chest from right under your armpits. Make sure that the highest point of your chest and your shoulder blades are included in the measurement.

SLEEVES & BACK LENGTH

With your arm hanging slightly bent & relaxed, measure from the point of your shoulder down to your wrist. For the length of the garment, measure from neck seam to hem.

NECK

Measure the base of your neck, or take a measurement from a collared shirt that fits well. Pressing the collar flat, take your measurement from the centre of the button to the end of the button hole.

GARMENT STYLES & SIZING

Different garments are designed to offer different fits. Some have a loose profile, while others are trimmed in around the waist and have structured shoulders.

Garment sizing varies between brands and styles. The best way to ensure a good fit is to go by your physical measurements – not your current shirt size. To get the perfect size, lay your favourite shirt flat on a table and measure the chest. By selecting a size that is close to your favourite shirt's measurements, you will ensure a good fit. All measurements are within a tolerance of 1 – 1.5 cm.

WASHING

Remember that cotton garments can shrink as much as five percent! This is especially important for sleeve lengths and neck fittings. For the best results, always follow the care instructions sewn inside your garment.

Candidate Shirt - ladies' short sleeves'. See page 3 for details.

STENCIL CUSTOM FABRICS 2015/2016

SILVERTECH® RANGE

A blend of Cool Dry® and nano-scale silver yarn-treated thread, SilverTech® takes feeling fresh to a new level. One of the oldest anti-bacterials known to man, silver fights odour from inside each thread of the fabric. And because it's nano-scale yarn treatment, it won't wash out - keeping you fresher for the life of the garment.

FRESH COLLECTION

A collection of premium classic cottons in a variety of weights and styles.

BIO-WEAVE® COLLECTION

Maximum comfort, soft on your skin. A silky blend of plant cellulose, Stencil Bio-Weave® is a natural fabric with highly durable qualities. Produced using an eco-friendly manufacturing process, it is easy care and static-free. Bio-Weave® is kind to sensitive skin and rated at UPF 50+.

COOL DRY® RANGE

Stencil Cool Dry® products were introduced into the Australian market in 2002. The fabric we select is a high quality yarn, treated to give it a long-lasting cool dry effect. It has a very soft and silky texture and is manufactured using the latest technology. Cool Dry® is a registered trade mark.

CLIME-DRI® RANGE

Stain resistant with a 50+ UPF rating, Clime-Dri® shirts offer the same cool wearing as Cool Dry® garments. A soft, silky touch and completely comfortable.

NANO-GEAR® RANGE

Comfortable to wear and made of rich cotton Nano-Gear® offers the benefit of being totally stain repellent – even red wine slides right off! easy care and breathable, Nano-Gear® is ideal for corporate uniforms.

BASICS® RANGE

The Stencil Basics® range has been designed with an eye for style and economy. Featuring simple, classic cuts and basic Cool Dry® functions, these garments have a soft silky texture and are comfortable to wear year-round.

SHELL-TEC® RANGE

Static free, stretchable and easy to wear, Shell-Tec traps your body warmth with a high-tech, breathable design ideal for Australian conditions. Using multiple layers of fabric to form a compact skin, Shell-Tec provides warmth without the bulk of traditional cold-weather wear.

MICROFIT® RANGE

Designed using the latest Japanese technology, Stencil MicroFit® is a high density fabric ideal for Australian conditions. Windproof and warm with a soft finish, it breathes freely to keep you comfortable while keeping water and wind on the outside.
